Subject: Reanalysis of proposed beach listings

Craig and Melenee,

Here is our reanalysis of our 2002 proposed beach listings, per the BWQWG's draft listing methodology. Interestingly, it did not change any of our proposed listings or delistings, except that we evaluated each shoreline monitoring site individually (rather than lumping the data for all sites on a beach into one dataset), resulting in some sites on a beach not being proposed for listing, while others on the same beach continue to be proposed for listing. As I remember, our proposal is to list the extent of impairment as extending 50 yards on each side of the sampling point. Let me know if you have any questions.

The summary is that we still propose listing certain monitoring locations for the following beaches:

- San Buenaventura Beach
- Seaside Park, including Surfer's Point (also known as Promenade Park)
- Channel Islands Harbor Beach/Hobie Beach
- Ormond Beach
- Peninsula Beach
- Rincon Beach
- Avalon Beach
- Castlerock Beach

We still propose delisting one beach for bacteria:

Surfer's Knoll

Regards,
Renee

Notes:						
(1) Seaside Park Beach was originally proposed to be listed, with the reanalysis by individual sampling site, some locations are still proposed, while others are not proposed now.						
(2) Promenade Park is part of Seaside Park Beach. Original analysis grouped all sites from VC12000-VC17000 as one beach. With the reanalysis, each shoreline monitoring location was evaluated individually; as such some Promenade Park locations are listed.						
(3) San Buenaventura Beach was originally proposed to be listed, with the reanalysis by individual sampling site, some locations are still proposed, while others are not proposed now.						
(4) Channel Islands Harbor Beach was originally proposed to be listed, with the reanalysis by individual sampling site, some locations are still proposed, while others are not proposed now.						
(5) Ormond Beach was originally proposed to be listed, with the reanalysis by individual sampling site, some locations are still proposed, while others are not proposed now.						
(6) Avalon Beach should now be listed for 5 individual sites, rather than as one beach.
